This document is meant to support Hiring Managers in identifying and outlining key differences in job duties, responsibilities and requirements as the jobs progress in the job family to easily identify and select the appropriate JD for their area.
Grade 5

Conduct initial lab set
Monitor supplies and order inventories.
Perform pilot experiments and prepare lab demonstration materials.
Responsible for keeping laboratory facilities, equipment, and area in clean, safe working order.
Calibrate and maintain scientific equipment and instruments in accordance with prescribed requirements.
Perform minor equipment repairs and arrange for major repairs through supervisor or outside contractor.
Exchange technical and scientific information with others.
Inform supervisor of any defects or irregularities and take appropriate measures to rectify the situation.

Core Job Duties

• Conduct initial lab set-up in accordance with lab schedules and requirements.
• Perform pilot experiments and prepare lab demonstration materials.
• Demonstrate and train others on experimental techniques and the operation of laboratory equipment.
• Modify and adapt labs, as directed.
• Conduct routine analyses of data.
• Perform trouble shooting during the lab period to correct issues including, but not limited to, equipment failure and contamination.
• Update and maintain detailed records of lab preparations and procedures.
• Observe details and maintain accurate records of experiments and results.
• Calibrate and maintain scientific equipment and instruments in accordance with prescribed requirements.
• Perform minor equipment repairs and arrange for major repairs through supervisor or outside contractor.
• Exchange technical and scientific information with others.
• Inform supervisor of any defects or irregularities and take appropriate measures to rectify the situation.
• Responsible for keeping laboratory facilities, equipment, and area in clean, safe working order.
• Assemble and adjust tests and laboratory equipment for experiments and procedures.
• Operate, adjust, and maintain a variety of laboratory equipment and scientific instruments.
• Schedule laboratory equipment for use.
• Prepare a variety of chemicals, solutions, sterile media, staining reagents and other materials required for the lab.
• Pipette a variety of reagents and media.
• Update, maintain, and verify inventory control of chemicals, media, and supplies.
• Monitor supplies and order inventories.
• Responsible for the proper storage of materials and the appropriate disposal of waste.
• Adhere to standardized procedures and protocols when dispensing chemicals and base media.
• Input, maintain, and verify information in a variety of databases and spreadsheets.
• Conduct literature searches.

Supervision

• No formal supervision of others is required.

Scope of Job

• Under the direction of the immediate supervisor, participates in the execution of laboratory projects and experiments.
• Performs a variety of specialized technical tasks according to established methodology.

Education and Experience

• 3 year Community College diploma.
• 1 year experience.

Core Job Duties

• Conduct initial lab set-up in accordance with lab schedules and requirements.
• Perform pilot experiments and prepare lab demonstration materials.
• Demonstrate and train others on experimental techniques and the operation of laboratory equipment.
• Modify and adapt labs, as directed.
• Conduct routine analyses of data.
• Perform trouble shooting during the lab period to correct issues including, but not limited to, equipment failure and contamination.
• Update and maintain detailed records of lab preparations and procedures.
• Observe details and maintain accurate records of experiments and results.
• Calibrate and maintain scientific equipment and instruments in accordance with prescribed requirements.
• Perform minor equipment repairs and arrange for major repairs through supervisor or outside contractor.
• Exchange technical and scientific information with others.
• Inform supervisor of any defects or irregularities and take appropriate measures to rectify the situation.

Core Job Duties*

• Oversees day-to-day operations of a facility, laboratory or multiple laboratories.
• Coordinate the execution of experiments, projects and services.
• Establish priorities and ensure adherence to schedules.
• Provides technical guidance and assistance concerning work methods, the use of equipment and techniques, and the analysis of results.
• Review, test, evaluate, and modify equipment and methodology.
• Recognize and investigate apparent reasons for obvious deviations in results obtained.
• Write a variety of documents such as standard operating procedures.
• Conduct initial lab set-up in accordance with lab schedules and requirements.
• Perform pilot experiments and prepare lab demonstration materials.
• Demonstrate and train others on experimental techniques and the operation of laboratory equipment.
• Conduct routine and moderately complex analyses of data.

Education and Experience

• Bachelors Degree.
• 1 year experience.

Supervision

• Provides technical guidance and assistance concerning work methods, the use of equipment and techniques, and the analysis of results.
• Review, test, evaluate, and modify equipment and methodology.
• Recognize and investigate apparent reasons for obvious deviations in results obtained.
• Write a variety of documents such as standard operating procedures.
• Conduct initial lab set-up in accordance with lab schedules and requirements.
• Perform pilot experiments and prepare lab demonstration materials.
• Demonstrate and train others on experimental techniques and the operation of laboratory equipment.
• Conduct routine and moderately complex analyses of data.

Core Job Duties*

• Under the direction of the immediate supervisor, design new laboratory exercises and procedures and oversees the day-to-day operations of a facility, laboratory or multiple laboratories.
• Coordinates the execution of projects and service.
• Under the direction of the immediate supervisor, oversees the day operations of a facility, laboratory or multiple laboratories.
• Under the direction of the immediate supervisor, participates in the execution of laboratory projects and experiments.
